

# Learning & Development Services

**nice** Data Analytics Services  
Software Solutions Go Beyond Insights

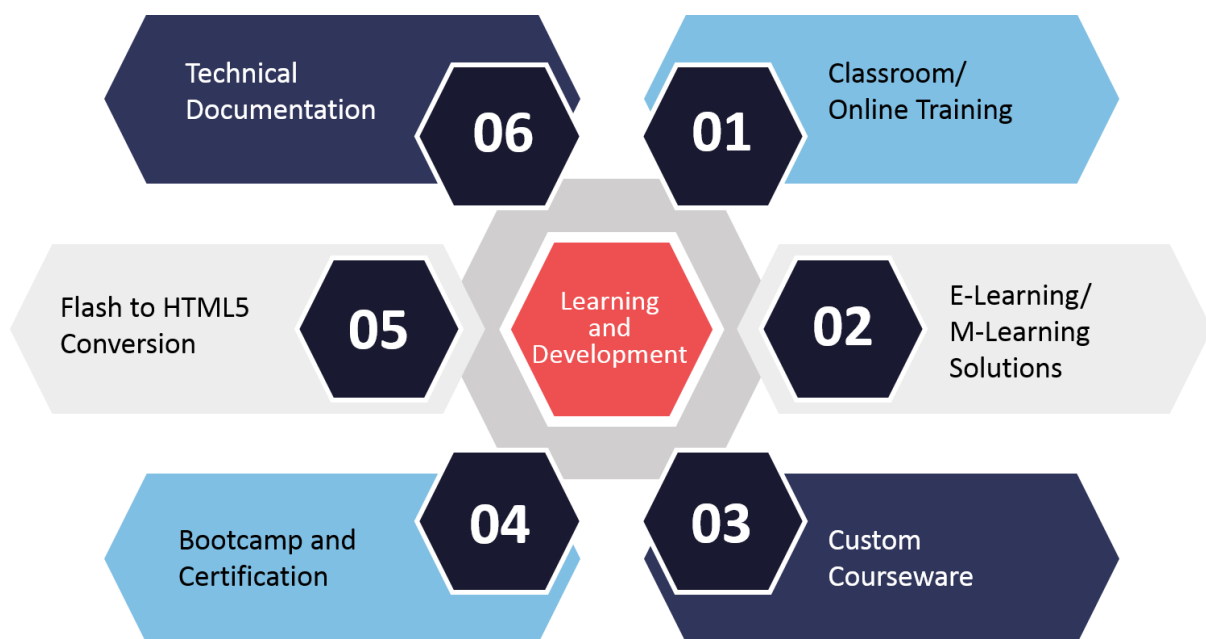

## Introduction

Nice Software Solutions (NSS) Pvt. Ltd is a professional services company, focusing in Business Intelligence and Data Warehousing solutions. We specialize in prime business intelligence and ETL tools such as MicroStrategy, PowerBI, Tableau, Qlik, ThoughtSpot, Informatica and many more. We are experts in producing quicker, impactful and user-friendly analytics within Data Warehousing and Business Intelligence domains.

The strength of NSS lies in its outstanding model of project execution that makes on-time and quality delivery possible for even the most complicated and advanced software and IT solutions. We are enriched with a talented pool of experienced software engineers from the top notch Technical and Research Institutes in the country.

Nice University is an integral and extended support system of NSS that aims at promoting and building a strong pool of IT professionals who can add value to their organizations. We offer custom training programs based on organizational requirements. We are committed to bringing the best out of your professionals by providing role-based trainings and creating courseware using various self-learning techniques and guidance from experts.

Our success is the result of a well-tested model of education delivery that makes it possible for us to train professionals at different levels – beginner, intermediate, and expert - on any and every software application.

Nice University's creative pool consists of experienced instructional designers, technical content strategists, curriculum developers, quality analysts, trainers, and subject matter experts. Their experience and exposure to different domains and technologies add versatility to the team. Our curriculum development team works together with the education delivery team to create customized content in various formats – ranging from e-learning tutorials to classroom training.

Our instructors make use of a wide variety of delivery methods to ensure end-to-end communication and transfer of information. Nice University offers you dedicated service at all stages of delivery - right

from requirement gathering to preparation and upgradation of your content. We are committed to train your professionals based on your project needs.

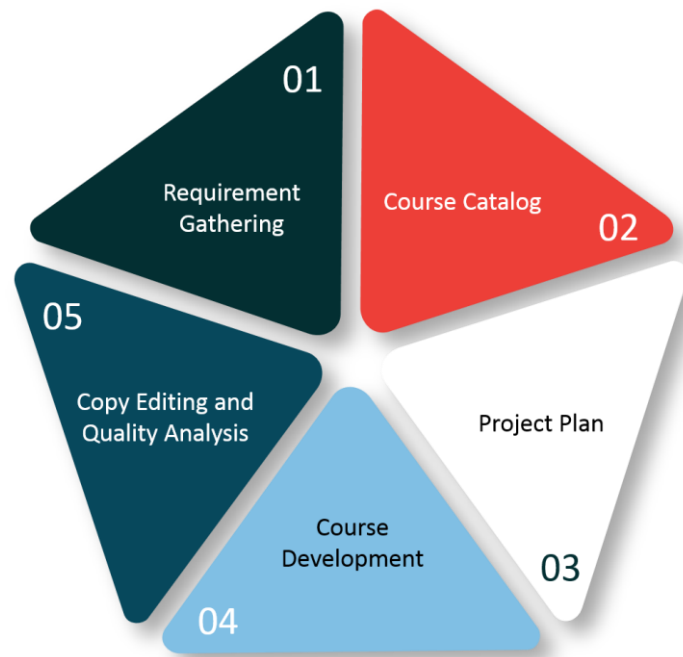

## Our Technological Strength

Some of the areas we specialize in, but not limited to are:

Advanced C R ThoughtSpot  
Cybersecurity Power BI  
Informatica Cloud Tableau  
**MicroStrategy** SSIS  
Python Informatica On Premise  
MS BI Big Data Hadoop Spark Developer  
Java Workday  
Microsoft Azure

## Our Approach to Curriculum Development

### 1. Requirement Gathering-

- Understand the audience
- Understand the need
- Understand the output
- Specify the writing standards, templates, color palate, etc.

### 2. Course Catalog-

- Introduce the course
- List the Course Objectives
- Specify the course duration
- Specify the audience
- Specify the related courses and pre-requisites
- Detail the Module names and objectives
- Detail the topics covered
- Include the demo plan
- Include the project plan, if needed

### 3. Project Plan –

- Team briefing
- Task division
- Project timeline
- Execution and Delivery plan

### 4. Course Development -

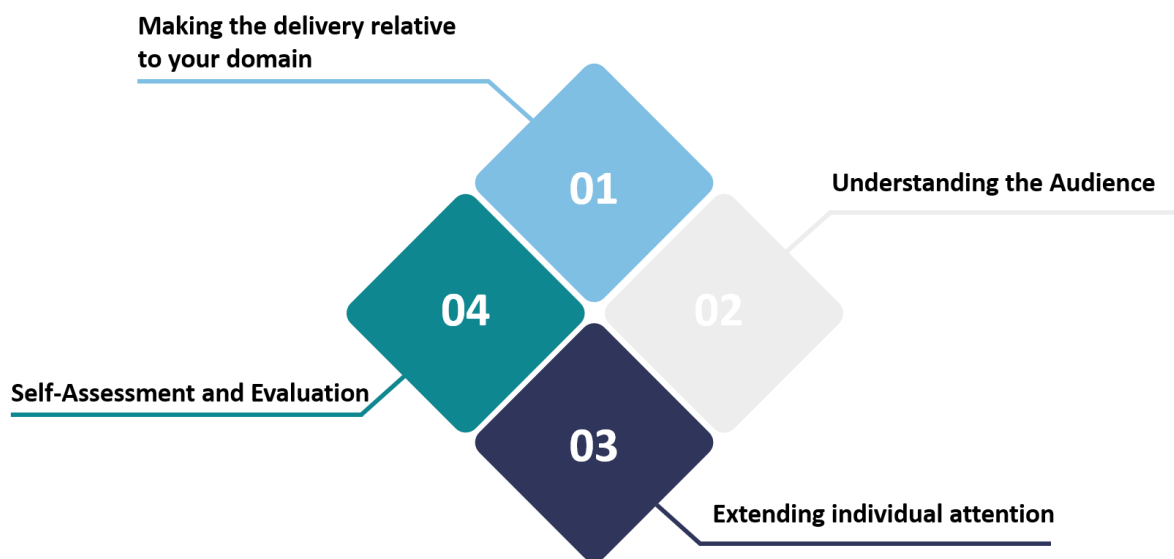

- Power point Presentation
- Demonstration

- Lab Guides
- Course Manual (if required)

## 5. Copy Editing and Quality Analysis

- Assess the content on Instructional Design and Graphical representation
- Assess the content for the writing standards for respective clients
- Perform a two-level testing for all the labs, case studies, and projects

## Our Approach to Education Delivery

### 1. Understanding the Audience –

Our instructors take a delivery approach that brings the best out of the audience. They spend time in understanding the thought-process, expertise, and expectations of the end users taking the training.

### 2. Making the delivery relative to your domain –

Our instructors ensure to include real-time examples and approach related to the end user domain. This helps the audience in grasping the concepts quickly and relating it to their everyday work.

### 3. Extending individual attention –

We understand that every individual has a different approach towards learning. The instructors aim to help every attendee in understanding the concepts to their best.

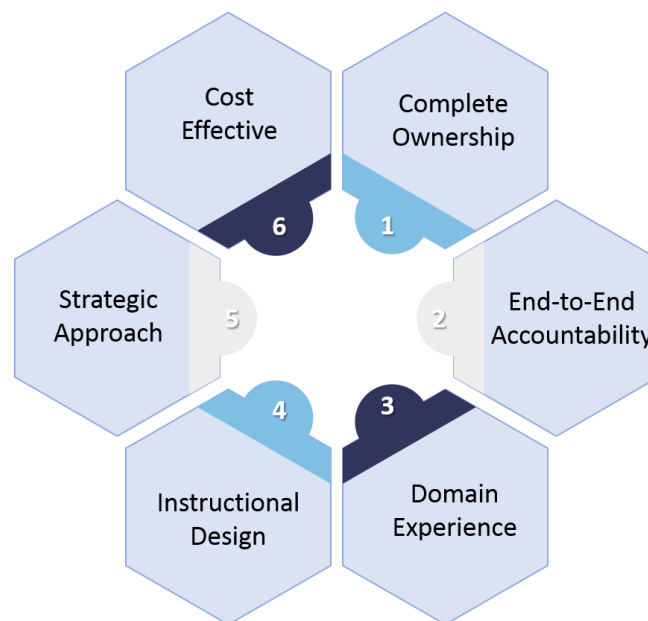

### 4. Self-Assessment and Evaluation –

We offer various self-assessment techniques including quiz, labs and projects for instructor-led trainings as well as self-paced learning, to help assess the students and derive value from the trainings.

## Our Creative Deliverables:

1. Dashboard Walkthroughs
2. Marketing Videos
3. End User Adoption Programs
4. 'How to' Videos
5. Role-based Certifications
6. Web Help Manuals
7. Product Documentations
8. Best Practices and Workaround Guides

## Why Choose Us?

1. We help you with a complete End User Adoption package for your products and applications
2. We take complete ownership to work with your L&D strategists to develop and refine a successful learning process.
3. We extract the best industry scenarios to incorporate in our training programs for attendees to make the most of it.
4. We use tailored Instructional Design techniques which best suits your work culture.
5. We work effectively and strategically to reduce the involvement of your Subject Matter Experts, thus giving them more room to contribute to the business.
6. We offer best learning solutions in the most competitive rates.
